

F70

PRODUCT DESCRIPTION

The launch of Yamaha's F70 changed customers' expectations of outboards in this category forever.

Beating in the heart of the F70 is a unique four-cylinder, 16-valve design activated by a single overhead camshaft. The 4-valves per cylinder valvetrain has dramatically increased this outboard's volumetric efficiency, effectively transferring more air and exhaust at a more efficient rate. This makes the F70 more fuel-efficient, promotes a stronger torque band and makes the F70 lighter than all four-stroke and direct injected two-stroke competitors.

The F70's awesome performance offers huge versatility and makes it the perfect power option for a huge range of mid-sized fishing boats and pleasure craft.

The 70 horsepower is now available in both traditional Yamaha grey and new pearlescent white colour options, in a long shaft only.

Performance Reports

We take out the guess work in buying a new outboard, by rigorously testing our range of engines on Australia's most popular boating brands. See how your favourite Yamaha powered boat performs for acceleration, fuel economy and top-end speed. [View F70 Performance Reports](#)
